

## Introduction:

In this project we'll make our own version of the highly popular mobile game Flappy Bird. This project requires Scratch v2.0.

Press the space bar to flap and try to navigate through the gaps in the pipes!

**Activity Checklist** 

Follow these INSTRUCTIONS one by one

**Test Your Project** 

Click on the green flag to TEST your code

Make sure to **SAVE** your work now

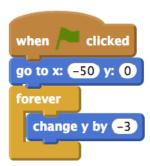

Keep track of your progress by ticking off the boxes below:

# **Step 1: Make Flappy fall**

7

## **Activity Checklist**

1.	Start a new Scratch project. Delete the cat by right-clicking it and selecting Delete	
2.	Replace the background with an outdoor landscape. <b>Desert</b> is a good choice.	
3.	Add the Flappy character. You'll need a sprite with costumes for wings up and wings down. parrot is a good choice.	
4.	Change the name of your sprite to <b>Flappy</b> .	
5.	Give Flappy the following script:	

## **Test Your Project**

Click the green flag, does Flappy start in the middle of the screen and then fall to the bottom?

Save your project

# Step 2: Make Flappy fly

Next, we want Flappy to flap upwards when you press the space bar.

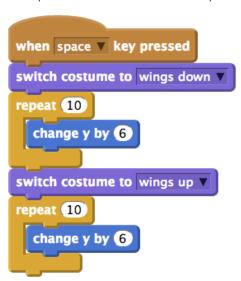

## **Activity Checklist**

1. Click the Costumes tab and name the costumes wings up & wings down.

Keep track of your progress by ticking off the boxes below:

2. Now switch back to the Scripts tab and add this script:

## **Test Your Project**

Click the green flag, are you able to control Flappy with the space bar? Do you notice that sometimes you press the space bar but Flappy doesn't move? We'll fix that next...

Save your project

# Step 3: Fix the controls

We'd like Flappy to respond every time we press the space bar. But when we push the space bar Flappy begins two loops of movements. If we push the space bar again before these loops have finished, Scratch ignores the second press. To solve this, we'll use a variable to count up how many flaps we need to do.

## **Activity Checklist**

1.	Disconnect the blocks under the when space key pressed and put	
	them to the side (we'll use them in a few moments.)	
2.	Make a new variable For this sprite only and call it flaps.	
3.	Add the following script by dragging in the blocks you put aside:	

Keep track of your progress by ticking off the boxes below:

```
when clicked

set flaps v to 0

switch costume to wings up v

forever

repeat until flaps = 0

change flaps v by -1

switch costume to wings down v

repeat 10

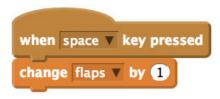

change y by 6

switch costume to wings up v

repeat 10

change y by 6
```

4. Finally, add to your when space key pressed event:

Click the green flag, does Flappy now flap once for each time you press the space bar?

# Step 4: Add the pipes

Next we'll add some obstacles for Flappy to fly through.

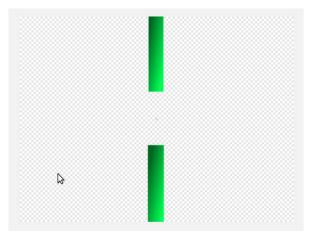

Keep track of your progress by ticking off the boxes below:

<b>✓</b>	Activity Checklist
1.	Click on the Paint new sprite button.

2. Name your costume pipe.

3	If the costume is in Bitmap	Mode	click	on	the	Convert	to	vector
	button.							

- 4. Click on the **Zoom** so that you can see the entire drawing area.
- 5. Click on the Rectangle, pick a colour, and click on the Filled rectangle button.
- 6. Click and drag two boxes, one from the top middle and one from the bottom middle as shown:

- 7. You can shade your pipes by clicking on the Color a shape button and click on the Horizontal gradient button. Choose two shades of the same colour one for the foreground and one for the background. When you click to fill the shapes, the colours will fade between your chosen colours.
- 8. Name your sprite Pipe.

Save your project

# **Step 5:** Make the pipes move

Next we'll make the pipes move and arrange them randomly to provide an obstacle course for Flappy.

Keep track of your progress by ticking off the boxes below:

## **Activity Checklist**

- 1. Click on your **Pipe** sprite and select the Scripts tab.
- 2. Add the following scripts:

```
when clicked
hide
set size to 200 %
forever
create clone of myself v
wait 2 secs
```

```
when I start as a clone

go to x: 240 y: pick random -80 to 80

show

repeat 120

change x by -4

delete this clone
```

## **Test Your Project**

Click the green flag. Do pipes appear with gaps to fly through at different heights? If you find it difficult to navigate Flappy through the pipes without touching them, you can make the gap bigger in the pipe sprite by editing the costume.

Save your project

# Step 6: Detect collision with the pipes

To make the game a challenge, the player needs to guide Flappy through the gaps without touching the pipes or the edges of the screen. Now we'll add some blocks to detect if Flappy hits something.

## **Activity Checklist**

Let's add a sound to play when Flappy collides.

- 1. Click on the Flappy sprite then on the Sounds tab.
- 2. Click the Choose sound from library button.

Keep track of your progress by ticking off the boxes below:

3.	Pick a collision sound for Flappy. The <b>screech</b> sound is good.	
4.	Now click back on the Scripts tab.	
5.	Add the following script:	
	when clicked  wait until touching edge ▼? or touching Pipe ▼?  play sound screech ▼	
	say Game Over!	
	broadcast GameOver ▼	
	stop other scripts in sprite ▼	
6.	Click on the Pipe sprite and add a script:	
	when I receive GameOver ▼	

# P

## **Test Your Project**

Click the green flag, does the game end when Flappy touches a pipe or the edge of the screen?

stop other scripts in sprite ▼

Save your project

# Step 7: Add scoring

The player should score a point every time Flappy makes it though a pipe. Let's add that next.

## **Activity Checklist**

Let's add a sound to play when Flappy scores a point.

1. Click on the Pipe sprite add a score sound; bird is a good choice.

Keep track of your progress by ticking off the boxes below:

2.	Now click back on the Scripts tab.	
3.	Make a new variable For all sprites and call it score.	
4.	Add a block to set score to 0 when the flag is clicked.	
5.	Add the following block:	

Click the green flag, does the player score points for flying Flappy through the pipes?

## Save your project

## Things to try

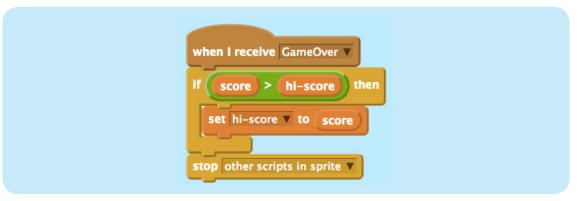

How many ways can you make this game easier or harder?

Well done you've finished the basic game. There are more things you can do to your game though. Have a go at these challenges!

C	hallenge 1: add a high score
	Make a new variable and tick the Cloud variable (stored on server) box. Call the variable hi-score
	When the game is over, add the following script to make the game

Keep track of your progress by ticking off the boxes below:

## **Test Your Project**

Click the green flag, does your score update the high score?

## Save your project

## Challenge 2: add gravity

When something falls under gravity it doesn't usually fall at a fixed rate. For this challenge we will make Flappy fall as if under gravity.

- Add a new variable For this sprite only to Flappy and call it rise.
- Change Flappy's falling script:

```
when clicked

set rise ▼ to 0

go to x: -50 y: 0

forever

change y by rise

change rise ▼ by -0.4
```

And change Flappy's flapping script:

```
when clicked

set flaps v to 0

switch costume to wings up v

forever

repeat until flaps = 0

change flaps v by -1

switch costume to wings down v

change rise v by 8

wait 0.2 secs

switch costume to wings up v

wait 0.2 secs
```

## **Test Your Project**

Click the green flag, does Flappy now accelerate when falling and flapping?

## Save your project

## Challenge 3: fall off screen When the player loses make Flappy fall off the bottom of the screen before ending the game. Replace the broadcast GameOver block with broadcast Fall Now add the following scripts: when I receive Fall ▼ repeat until 🕧 y position < -180 when I receive Fall ▼ change y by rise repeat 10 turn 🖹 🌖 degrees change rise ▼ by -0.4 hide broadcast GameOver ▼

Keep track of your progress by ticking off the boxes below:

Don't forget to add a show block and reset Flappy's direction when the game restarts.

## **Test Your Project**

Click the green flag, does Flappy now fall off the screen after hitting a pipe? Does Flappy reappear in the correct orientation when restarting the game.

## Save your project

Well done, you've finished! Now you can enjoy the game.

Don't forget you can share your game with all your friends and family by clicking on **Share** on the menu bar!
